

Asset Manager

Join a rapidly growing renewable energy company that matters to the future! We are looking to strengthen our **Asset Management team** with an **Asset Manager** for our Renewables Projects.

Responsibilities:

- Prepare periodic performance reports encapsulating technical and financial KPIs
- Monitor the performance of the wind farm & solar assets and contractors based on defined KPIs
- Collect and provide data for the preparation of the OPEX of the assets, with the objective to maximize the profitability of the asset
- Maintain record of ongoing contracts and prepare payment orders for contractual milestones for approval by the Senior Asset Manager. Liaise with finance and legal departments on a regular basis.
- Review Operation & Maintenance obligations (guaranteed availability, H&S standards etc.)
- Keep records and monitor spare parts inventory and respective warranties
- Review licensing status and assist in keeping all licenses of the assets up-to-date and in-force
- Provide strong support in handling insurance claims
- Perform site visits
- Follow up on asset malfunction until technical issues are resolved
- Assist Procurement Manager on an ad hoc basis in the market research for acquiring products and services needed for the optimal operation of the assets
- Serve as point-of-contact with team members based on-site.
- Managing of orders of payments
- Perform due diligence on sites under acquisition or under development

Qualifications:

- Bachelor's Degree in an Engineering related field.
- Some experience in the operation of Wind assets. Experience in Solar Assets will be considered an advantage.
- Excellent use of Greek and English language.
- Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Teams etc.)
- Excellent use of Scada systems and Wind simulation software.
- Clear understanding of technical operations and control of wind assets. Experience in Solar Assets will be considered an advantage.
- Excellent organization, communication and time management skills.
- Ability to handle multiple tasks and autonomously set priorities.
- Genuine interest for the Renewable Industry Sector.

National Energy is an Equal Opportunity Employer

About National Energy

Headquartered in London and founded in late 2018, National Energy is a privately financed corporate group uniquely positioned to make large-scale investments and strategic acquisitions in clean energy solutions. The group's renewable energy investment platform focuses on **Solar, Wind and Storage** solutions from greenfield development to long-term asset ownership. National Energy's mission is to develop, finance and operate a minimum of **2GWp** of renewable assets in the next five years with a focus on accelerating the transition to clean and affordable power.

National Energy currently holds a significant footprint in **Greece** since entering the market as a newcomer in late 2018 with a portfolio of **400MWp** of Wind and Solar under Construction or in Operation and **3GWp** of Wind, Solar & Storage development pipeline in Greece. The group is led by an international team with deep industry experience and works with reputable developers and contractors to take early-stage renewable energy projects through the development process. Particular reliance is given on expertise sourced locally while building strong teams in the countries in which we operate. Further, National Energy fully adheres to ESG principles, holding above all else, ultimate respect for the environment and communities in which it operates.
