Undergraduate Research Opportunities Program

UROP
2023

“ Investigate real world problems in exciting research areas! ”

The UROP encourages undergraduate students to engage in research activities and to nurture the skills, experience, and confidence required for such an endeavor. The program has been running each summer for the last 14 years. Between 2009 and 2022, a total of 92 students successfully completed the program. Students who joined the program gained valuable research experience, that helped them in their future professional career, since some of them progressed with a PhD degree in the field or secured a job position in the industry.

The students will participate in research activities spanning a variety of research areas such as:

- ⊗ Intelligent transportation systems
- ⊗ Smart water networks
- ⊗ Robotics, embedded and IoT hardware and software systems
- ⊗ Power systems, smart grids, and integration of renewable energy sources
- ⊗ Next generation telecommunication systems and networks
- ⊗ Disaster management and health care/biomedical systems

Students are expected to spend an average of 30 hrs/week for 4 to 8 weeks between June 6 and July 28, 2023. The weekly salary is €200.

“This program has helped my professional and personal development because it gave me the opportunity to understand what research is in practice. Also, problem solving was another thing I learned. Furthermore, I collaborated with many researchers from KIOS, which is something really useful, to be able to get feedback about the material you are working on and also learn from them. To summarize, research and communication were the most important things this program has helped me with”.

Panayiotis Aristodemou,
ECE student at the University of Cyprus

“I have gained valuable skills and experiences through my participation in the KIOS UROP program, as I improved my teamwork and time management skills and enhanced my critical thinking. Moreover, I got acquainted with programming (MATLAB)”.

Mikaella-Maria Charalambides,
Medical student at King's College London

“ Work alongside researchers who are leaders in their fields! ”
