

.NET Web Application Developer

Are you a skilled and passionate developer with expertise in .NET Web Application development? We are seeking a highly motivated individual to join our dynamic team as a .NET Web Application Developer. If you have a strong background in C# programming, a deep understanding of the .NET framework, and experience with ASP.NET MVC, we want to hear from you!

Job Description:

As a .NET Web Application Developer, you will be responsible for designing, developing, and maintaining web applications using the .NET framework. Your primary focus will be on creating robust and scalable solutions that meet the needs of our clients and provide an exceptional user experience. You will work closely with cross-functional teams to ensure seamless integration of front-end and back-end technologies, contributing to the success of our projects and the growth of our organization.

Responsibilities:

Develop and maintain web applications using C# programming language and the .NET framework.

Implement and enhance features on existing ASP.NET MVC applications while adhering to best practices and coding standards.

Collaborate with the UI/UX team to create responsive and visually appealing user interfaces using HTML, CSS, and JavaScript.

Integrate data storage solutions using SQL and efficiently manage databases, such as MS SQL Server.

Explore and implement opportunities to optimize application performance and enhance overall system efficiency.

Stay up-to-date with the latest trends and advancements in web technologies, incorporating relevant improvements into our development process.

Work on the integration of front-end technologies and frameworks like Angular, leveraging their benefits to improve the user experience (knowledge of Angular is considered a plus).

Familiarize yourself with web hosting control panels to efficiently deploy and manage applications in various hosting environments.

Troubleshoot and resolve technical issues, ensuring the smooth operation of web applications.

Collaborate with team members to brainstorm ideas, share knowledge, and support each other's professional growth.

Requirements:

Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent work experience).

Proficiency in C# programming language and a strong grasp of the .NET framework.

Demonstrated experience with ASP.NET MVC and a solid understanding of its architecture.

Familiarity with web technologies such as HTML, CSS, and JavaScript.

Knowledge of SQL and experience working with database management systems, especially MS SQL Server.

Understanding of front-end technologies and frameworks like Angular is an advantage.

Familiarity with web hosting control panels will be beneficial.

Excellent problem-solving skills and attention to detail.

Strong communication and collaboration abilities.

Ability to work independently as well as part of a team in a fast-paced environment.

ScEv provides a creative, challenging and dynamic environment which encourages team spirit, cooperation and continuous learning.

To the right candidate we offer:

Very satisfying full-time salary from day one

Performance related bonuses

30 days paid annual leave

Paid business trips in EU cities, quarterly

Continuous improvement & training

If you are interested in the above mentioned position, please send your CV at info@scientificevents.eu

All applications will be treated confidentially.
